

WORLD TOILET DAY

19 November 2021

Umgeni Water maintains that sanitation is dignity and this is supported by providing clean potable water to communities in order to uphold human dignity.

Help protect human dignity this World Toilet Day 2021 by stopping the spread of deadly and infectious diseases such as gastroenteritis, cholera and typhoid by maintaining healthy toilet habits.

DO's	DON'Ts
<ul style="list-style-type: none">Remember the importance and value of clean toilets in our lives.Protect the dignity of women and girls by building safe toilets.Maintain and keep toilets clean at all times.Flush the toilet, but use water sparingly.Wash hands with soap and water after visiting the toilet.Always keep food and water covered.	<ul style="list-style-type: none">Do not use open velds as toilets.Do not build toilets close to water sources, to avoid water pollution.Do not flush foreign objects down the toilets, this causes blockages and clogs sewage pipes.When using pit toilets, do not throw foreign objects as this fills up the pit and limits its lifespan.Stop using outside toilets as storerooms because this destroys the structure of the toilet.Stop dumping disposable diapers.

Public health and hygiene depend on the availability of both clean water and user-friendly toilets. Toilets and good sanitation preserve the dignity of communities and drive improvements in gender equality, education, economics and the protection of the environment. Life without a toilet is unclean, hazardous, undignified and unhealthy. We need to value toilets.
